It was admitted, however, that the story had this much foundation: That a suggestion has been made in the conferences over Northern Pacific control for a division of C., B. & Q. This proposal, however, originated with Mr. Hill, and was one of many suggestions which have not been long discussed.

Mining Stocks in New York.

At the present time the dealings in copper on the exchange are entirely in lake copper. The new copper certificates would be
issued on any kind of copper, provided the
metal was stored in New York warehouses.
The minimum basis of test for a contract
would be 95 per cent pure copper. For every
point above that test, I per cent would be
added to the value of the certificate.

AT EXTREME LOW EBB. Uncertainty Over the Money Market the Chief Factor in a Gen-

eral Depression.

SPECULATIVE INTEREST IS

New York, Oct, 21.—Speculative sentiment continued profoundly dubious to-day, but instead of the conflicting movements of prices and the confusion which have reflected this condition for some time past, the stock market sank into a lethargy. Even the profeserators seemed to give up the idea of attempting to foresee the future movement a year to find a similar period of duliness. change fell below the corresponding period of last year for the first time during the present calendar year. This fact and to-day's duliness, which was even more marked, are striking evidence of the uncertainty which has overcome the speculation, due immediately to the emergency of Southern Pacific problem, and the disclosure of the fact that the actual terms of settlement still

fact that the actual terms of settlement still remain to be agreed upon.

Cause for Hesitation.

While the incumbency of the Conciliation Board of Directors, of course, affords a strong guarantee against the outbreak of the quarrel again, the members of that body seem to have practically the whole task yet before them of finding a plan which will be acceptable as a final settlement to both parties and relieve the strained condition growing out of the load of securities carried for control now by means of bank loans. Incoming foreign milh disclose that the importance of this problem is fully recognized throughout the financial world, and its state of suspension acts as a repressive influence on speculation. The continued uncertainty of the mency market outlook is another doubtful factor.

Money Market Uncertain. fact that the actual terms of settlement still

money Market Uncertain.

Money continues to go to the South and the Subtreasury at New York to remove the surplus in the revenue from the circulation, while sterling exchange rose again to-day. As this marks the process of the remittance for repayment of foreign borrowings, it was not unnatural that the London money market should respond with a decline in rates. Money market pressure at Paris and Berlin continues, and the ultimate future of those markets when the heavy year-end requirements come to be met is a question still to be solved.

New York banks to-day had the benefit of payments from the Subtreasury of almost \$2,000,000 on account of Australian and Klondike gold. Movements of special stocks to-day call for little specification. There was some early strength led by the Facifics, but the general tendency was downward from limition. Amalgamated Copper lost practically all of Saturday's gain.

Railroad bonds were very dull and about

Operators active in manipulating several stocks recently put some buying orders in the opening and induced covering by room traders. Then London selling and the supply of a little long stock depressed prices slightly around the room. The cerrmienion business was small for Monday, and after the first hour the appearance of the Stock Exchange floor was more lifeless than it had been for a very long period.

In the afternoon the market weakened under liquidating sales of speculative accounts by one of the lerge traders, who was a prominent buyer last week. There was no news of any kind, and the selling was apparently due wholly to disap-pointment over the lack of buying after the first

in a church trial begun here to-day, disloyalty and agitating against the German M. E. Church of Sedalia being the charge. The trouble arose over the Reverend Mr. Hausom objecting to the use of the English language at the Sunday night services. So strong was the opposition to the Reverend Mr. Hausom that gradually a quarrel arose, which threatened to prove serious. The matter was agitated and wranglings ensued that foreshadowed a disruption unless something was done. It was then that charges were presented to the conference, which in turn ordered the trial.

The Reverend C. Ott, Presiding Elder of the Kansas City District, is presiding at the trial. A committee has been selected to which the evidence will be submitted, and upon whose report the conference will take action. The Reverend Doctor Lenig of this city will defend the Reverend Mr. Hausom against the charges, and the Reverend G. J. Kolb of Lawrence, Kaz., will conduct the church's case. The trial will last a couple of days.

### TO MAKE TEST OF FIRE PRESSURE.

Valentine Press Hangs Himself in Council Authorizes Fire Marshal to Investigate the Water Service-May Disfranchise Company.

> The all-absorbing water question was the theme for action at the meeting of the Belleville City Council yesterday afternoon. The water company has been given twenty days in which to prove to the satisfaction of Fire Marshal Nebgen and other city officials that it is keeping up the fire pressure and is able to furnish adequate pressure in the event of an emergency. Alderman John Gebhard of the Fifth Ward, who was elected to fill the place made vacant by the resignation of Alderman Thebus, took the oath of office. The discussion of the water question was started by the rending of a letter to the members of the City Council, signed by one of the principal steckholders of the company, in which the statement was made that the fire pressure called for in the contract and the 2000,009 gallons of deep-well water daily would be supplied if a copious rain would fill the reservoirs of the company, so that this water could be used for the manufacture of Belleville instead of the deep-well water, which is now furnished.
>
> Alderman Schniper introduced a resolution to disfranchise the water company if, at the end of twenty days, the tests to be made by man Thebus, took the oath of office. The

end of twenty days, the tests to be made by the Fire Marshal and other officials showed that the company was not living up to its contract. The resolution was adopted by

contract. The resolution was adopted by a vote of 11 to 2.

Mayor Hay reported that he had vetoed the allowance of \$4.690 voted at the last meeting of the Council to the water company. This roused a discussion among the Councilmen, and the matter was finally left to the City Attorney to look into the legality of such an act on the part of the Mayor.

surprise in the vicinity of Mozier. It is as follows:

"Hettick, Iii., Oct. 8, 1901.—Mr. George Fox, Mozier, Ill.: Dear Sir—Since the Lord saved me one year ago last January i have felt that it was my duty to write and ask your forgiveness for a wrong I did you some years ago when you lived at Shoch. You know the boys got in and destroyed your watermelons. Well, I was one of them, and I write you this letter to ask your forgiveness. I am preaching now and am stationed at Hettick, in Macoupin County, Ill., preaching in the Free Methodist Church. Well, forgive me, George, and may the Lord bless you is my prayer. Yours in the Lord. B. C. JOHNSON."

The incident referred to by the Reverend Mr. Johnson occurred two decades ago, and was considered trivial at the time by Fox.

#### GENERAL GREELY'S RETURN.

Chief Signal Officer Completes His

London, Oct. 21.—Brigadier General A. W. Greely, chief of United States signal office, has arrived here after five months spent in Japan and the Philippines, inspect-

spent in Japan and the Philippines, inspecting the army and navy telegraphs and cables.

After making some official investigations in London, in connection with the cable service, he will return to Washington.

The General is greatly pleased with the efficiency of the six thousand miles of cable and telegraph lines now working in the Philippines. He considers that the country and the people both offer great possibilities, and he is enthusiastic over the Japanese telegraphic service.
